A. S. MORGAN DATE

11 Mar 2020

1. GENERAL REQUIREMENTS

The Contractor shall provide all necessary labor, management, tools, material, and equipment to perform restoration of high expansion foam fire extinguishing system at U.S. Fleet Activities, Sasebo, Japan.

2. WORK DESCRIPTIONS

Encl: (1) Location Map

(2) Foam Fire Extinguishing System Drawings, Bldg. 7029

The Contractor shall clean and inspect the high expansion foam fire extinguishing system, refill the tank with foam concentrate, and perform an operational test. Location of the system is Bldg. 7029 at Yokose LCAC Facility. Location map is provided in enclosure (1). All materials and parts used in this work shall be OEM certified products.

2.1 SYSTEM CLEANING

- a. The Contractor shall flush and clean the inside of high expansion foam tank, pipes and valves connected to the foam tank and foam proportioner (foam/water mixing device), and strainer fire extinguishing system with water. The foam proportioner shall be taken apart for cleaning to ensure proper functioning. The Contractor shall collect the mixture of water and foam, store them in the Contractor-provided tank, and dispose of as industrial waste.
- b. The Contractor shall dispose of plastic bottles of foam concentrate stored in the mechanical room in Bldg. 7029 as industrial waste.
- c. The Contractor shall provide and prepare a manifest. The Government personnel will sign and retain a copy of transportation manifest prior to industrial waste leaving the base. Final disposal manifest shall be returned in accordance with all applicable Japanese laws and regulations.

2.2 SYSTEM INSPECTION AND REPAIR

The Contractor shall perform thorough inspection of the high expansion foam fire extinguishing system and all of its components. Identify any deficiencies and perform necessary repairs to ensure the system functions properly.

2.2.1 System Data

- a. The high expansion foam fire extinguishing system was designed and installed in 2013 at Bldg. 7029 by NOHMI BOSAI LTD. System drawings are provided in enclosure (2).
 - b. Original equipment manufacturer (OEM) is NOHMI BOSAI LTD.

2.3 REFILLING THE FIRE EXTINGUISHING TANK

The Contractor shall provide foam concentrate and refill the tank of fire extinguisher with Contractor-provided foam concentrate listed in paragraph 2.3.1. Method of work to refill the tank with foam concentrate shall be OEM recommended and approved procedures.

2.3.1 Product data: Foam concentrate

Product Name: SNOWRAP SD 3%, High expansion foam

Quantity: 1,500 liters (396.3 gallons)

Manufacturer: NISSIN RIKA SANGYO CO., LTD.

2.4 OPERATIONAL TEST

The Contractor shall conduct an operational test to ensure proper operation and restore the system to an alert state in the presence of Government personnel. Test results shall be recorded on the check sheet.

3. PROJECT SCHEDULE

The Contractor shall complete the work within the period as stated below.

- 3.1 Pre-Performance Submittals: Within five working days after the Contractor received the notice of award for Government acceptance.
 - a. Work schedule
 - b. List of personnel
 - c. Safety Plan (APP and AHA)
 - d. Safety Data Sheet (SDS) of foam concentrate
- 3.2 System Restoration Work: Maximum 60 calendar days after the Contractor received the notice of award.
- 3.3 Submittal of Work Completion Report: Within five working days after completion of system restoration work.
- 4. MANAGEMENT AND ADMINISTRATION
- 4.1 Government Regular Working Hours

The Government regular working hours is 0800 - 1645, five days a week, Monday through Friday except the following observed Federal Holidays:

New Year's Day, Martin Luther King Jr.'s Birthday, President's Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day

4.2 Personnel

The Contractor shall provide personnel complying with the requirements.

- 4.2.1 Key Personnel
- 4.2.1.1 Project Manager (PM)

The Contractor shall provide a PM who has the full authority to act for the Contractor on all contract matters relating to this contract. The PM shall be on-site during the Government regular working hours and shall be available on-site within two hours after the Government regular working hours. The PM shall have satisfactory relevant experience at a comparable level of responsibility on contracts of similar size and complexity.

4.2.1.2 Quality Manager (QM)

The QM shall be on-site during the Government regular working hours and shall be available on-site within two hours after the Government regular working hours. The QM shall have satisfactory experience in preparing and enforcing quality management program on contracts on similar size and complexity. The QM may be the same person as the SSHO.

4.2.1.3 Site Safety and Health Officer (SSHO)

The Contractor shall provide a SSHO whose primary duty and responsibility is to prepare and enforce the Contractor's safety program on this contract. The SSHO shall have satisfactory experience in preparing and enforcing safety programs on contracts of similar size and complexity in the past and have completed the OSHA 30-hour construction safety class or equivalent. Acceptable equivalent courses are the Japan Construction Occupational Safety and Health Association (JCOSHA) safety course "Course for Construction Site Foreman (工事主任コース)" or "Course for Construction Site Managers (所長コース)". JCOSHA website: http://www.kensaibou.or.jp. The SSHO may be the same person as the PM if qualified.

4.2.2 Personnel Working on the System

The personnel working on the high expansion foam fire extinguishing system must be trained by the OEM and have profound knowledge of the system for system restoration work.

4.3 SAFETY

The Contractor shall develop and implement a safety program detailing how the Contractor plans, staffs, preforms, and controls all safety practices while delivering best value services for the Government without any accidents or mishaps. All work at the fire extinguishing system and the associated tank shall comply with all standards in the U.S. Army Corps of Engineers Safety and Health Requirements Manual, EM 385-1-1. EM 385-1-1 is available at the website: https://www.publications.usace.army.mil/Portals/76/Publications/EngineerManuals/EM 385-1-1.pdf.

a. Accident Prevention Plan (APP)

The Contractor shall develop and implement an Accident Prevention Plan (APP). The APP shall be prepared by the Contractor's SSHO and shall be followed by all Contractor employees, subcontractors, and vendors. The APP shall follow the abbreviated format and include at a minimum, elements addressed in paragraphs 3.k. of Appendix A of EM 385-1-1. The Contractor shall submit an APP for acceptance.

b. Activity Hazard Analysis (AHA)

The Contractor shall prepare Activity Hazard Analysis (AHA) for all applicable common requiring work activities performed under this contract. AHA shall be submitted with the APP.

c. Accident and Damage Reporting

The Contractor shall notify the Contracting Officer as soon as practical, but no more than four hours after any accident or property damage equal to or greater than \(\frac{4}500,000\), or any Weight Handling Equipment (WHE) accident. Notification shall also be provided for any mishap occurring in any of the following high hazard areas: electrical (to include Arc Flash, electrical shock, etc.); uncontrolled release of hazardous energy (includes electrical and non-electrical); and weight or load handling equipment (LHE) or rigging; fall-from-height (any level other than same surface). These mishaps shall be investigated in depth to identify all causes and to recommend hazard control measures.

Within notification include Contractor name; contract title; type of contract; name of activity, installation or location where accident occurred; date and time of accident; names of personnel injured; extent of property damage, if any; extent of injury, if known, and brief description of accident (to include type of equipment used, PPE used, etc.). Preserve the conditions and evidence on the accident site until the Government investigation team arrives on-site and Government investigation is conducted.

(1) Notification Procedures

- (a) For any work-related injury or illness, property damage exceeding \(\frac{\pma}{5}\),000,000, or any WHE accident:
 - The Prime Contractor shall submit the initial accident report by completing the NAVFAC Contractor Incident Report System (CIRS), and submit to KO and COR within 24 hours of accident occurrence. Blank form of CIRS will be provided by the Government. The Contractor shall follow the direction by the Government for submission format.
 - Follow up report shall be submitted within 24 hours of accident occurrence.
 - The prime Contractor shall conduct an accident investigation to establish the root cause(s) of the accident.
 - The Contractor shall submit the final incident report by completing the CIRS no later than 30 calendar days of accident occurrence.
 - For any WHE accident, in addition to above procedures, the Contractor shall comply with additional requirements and procedures in accordance with NAVFAC P-307 Weight Handling Program Management, Section 12. The Contractor shall submit a WHE Accident Report (Crane and Rigging

Gear). No crane operations are allowed until cause is determined and corrective action have been implemented to the satisfaction of the Contracting Officer. NAVFAC P-307 is available at the website:

 $https://www.navfac.navy.mil/navfac_worldwide/pacific/fecs/far_east/about_us/contractors_information.html\\$

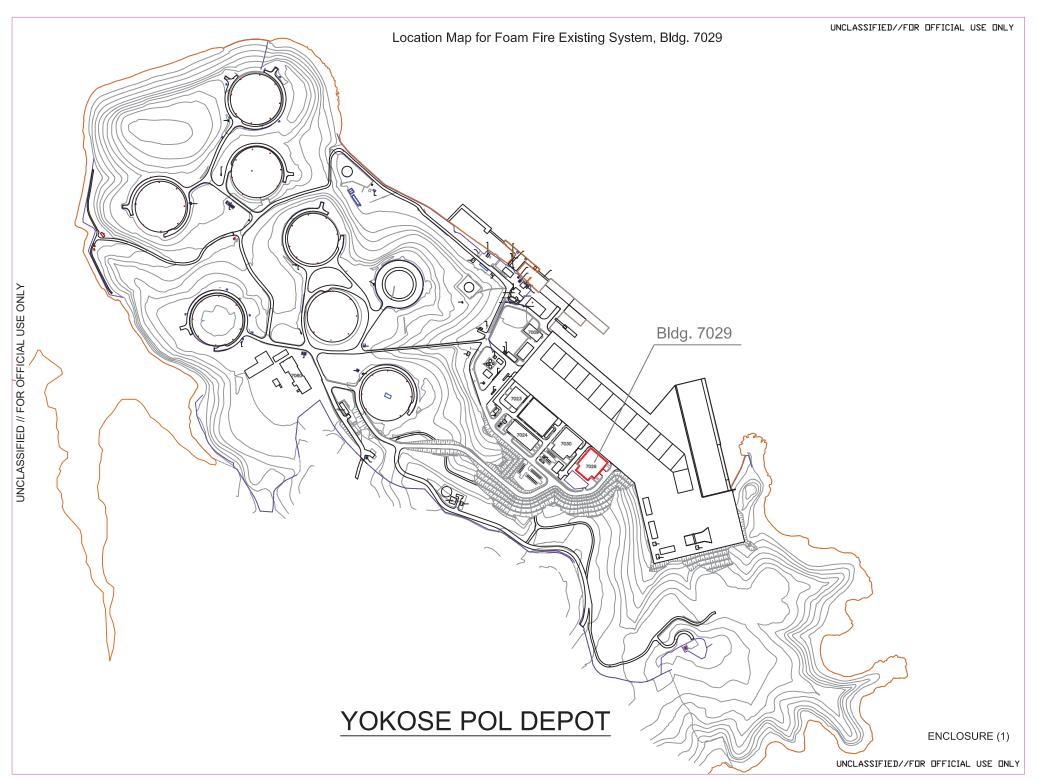

- (b) For property damage equal or less than \(\frac{1}{2}\)5,000,000:
 - The prime Contractor shall submit the initial accident report by completing the NAVFAC Contractor Incident Report System (CIRS), and submit to KO and COR within three working days of accident occurrence.
 - The prime Contractor shall conduct an accident investigation to establish the root cause(s) of the accident. Submission of CIRS is not required.

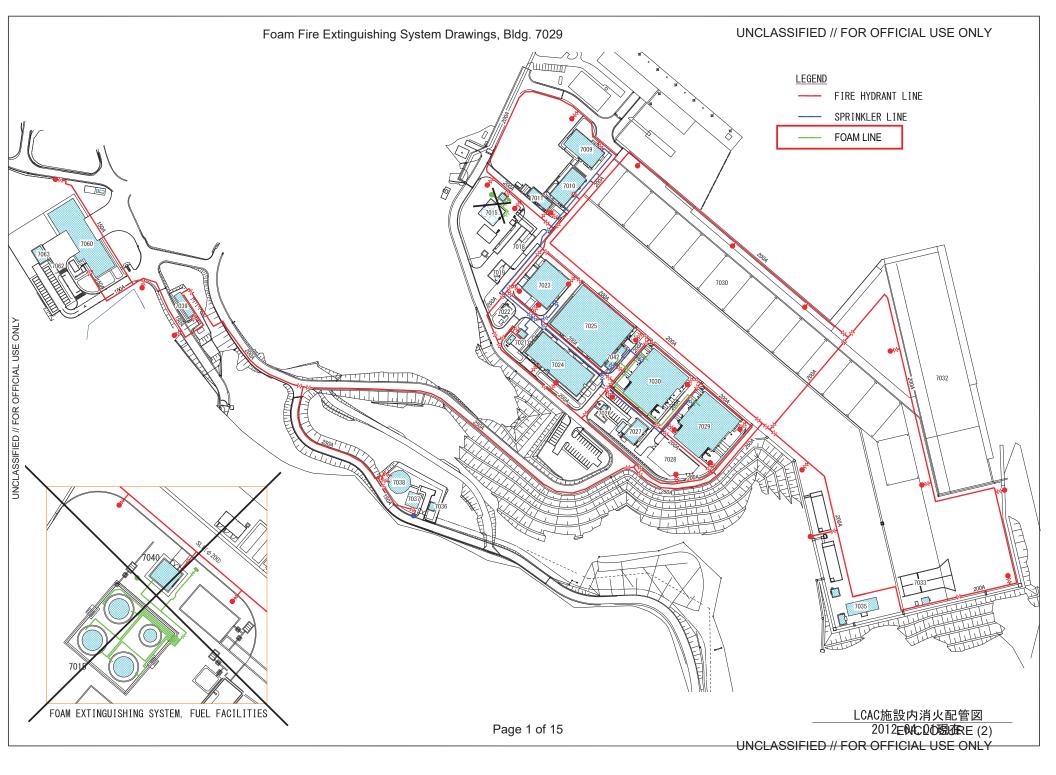

4.4 SUBMITTALS

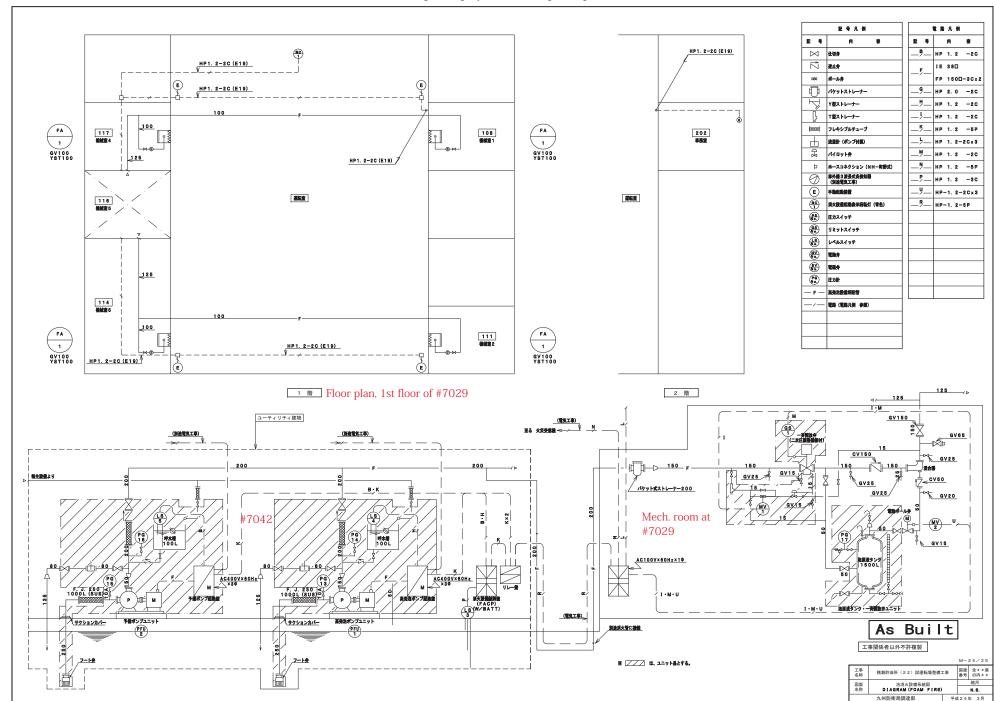

The Contractor shall submit the following documents to the Government. The submittals shall be prepared in English or Japanese with English translations.

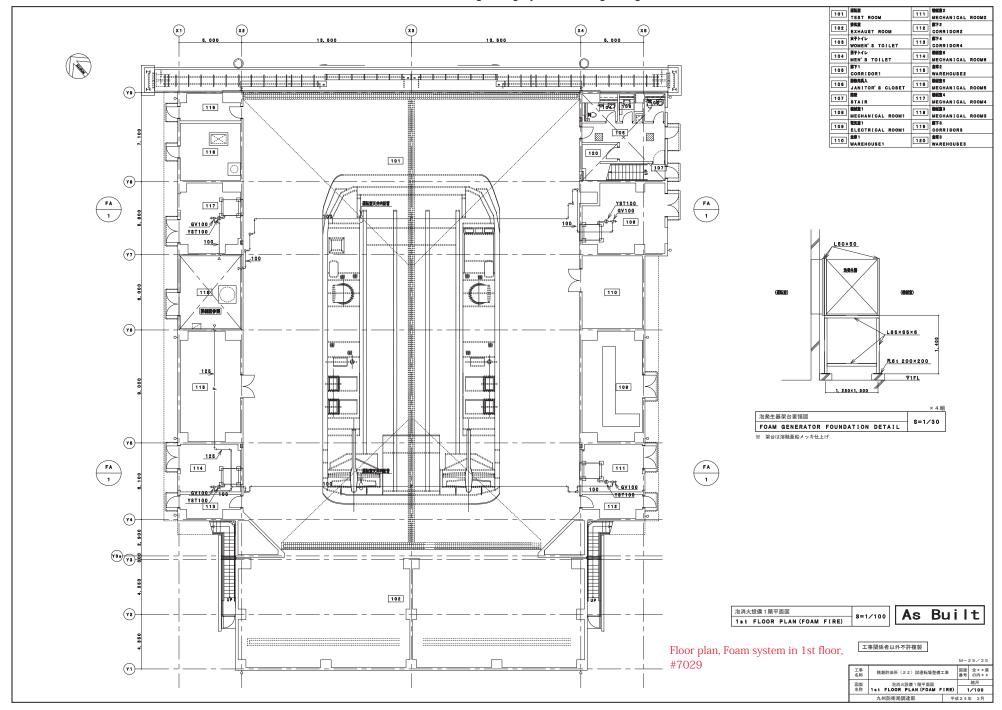

- a. Work schedule.
- b. List of personnel. List includes Key Personnel, and prime contractor and subcontractor personnel.
- c. Safety Plan (APP and AHA).
- d. Safety Data Sheet (SDS) of foam concentrate.
- e. Work completion report. Attach the complete check sheet that contains results of operational test and proves the system is fully functional.
